Description of the requirements:

Purpose of the document:

The purpose of this document is to give a description of the whole structure of a web-based system that will allow Volunteering teams to manage their events, assigning members to events teams and managing the attendances.

Project Goals and requirements:

1. The system shall allow the guest user to register as a new volunteer.
2. The system shall allow the user to browse the Incoming events.
3. The system shall allow the user to search for a particular event.
4. The system shall allow guest users to sign in.
5. The system shall allow the signed-in users to sign out.
6. The system shall allow the signed-in users to view profiles.
7. The system shall allow a signed-in user to apply to participate in an event.
8. The system shall allow signed-in users to check the status of their applications.
9. The system shall allow the signed-in user to cancel his application.
10. The system shall allow the signed-in user to view the previous events that he did participate in it.
11. The user shall be able to see an overview of the website.
12. The user shall be able to sign up.
13. The user shall be able to sign in.
14. The user shall be able to Browse the incoming events.
15. The user shall be able to search for a particular event.
16. The Team member shall be able to check his profile.
17. The Team member shall be able to Browse the incoming events.
18. The Team member shall be able to apply for events.
19. The Team member shall be able to check his application status.
20. The Team member shall be able to cancel his application.
21. The Team member shall be able to check his attendance.
22. The System admin shall be able to add members.

23. The System admin shall be able to delete members.
24. The System admin shall be able to block members.
25. The System admin shall be able to create an event.
26. The System admin shall be able to delete an event.
27. The System admin shall be able to edit an event.
28. The System admin shall be able to assign a member to a specific team.
29. The System admin shall be able to generate a report about Event.
30. The System admin shall be able to generate a report about Team Events.
31. The System admin shall be able to generate a report about Team Members.
32. The System admin shall be able to assign an event to a specific team.
33. The System admin shall be able to schedule an event.
34. The team leader shall be able to create an event.
35. The team leader shall be able to delete an event.
36. The team leader shall be able to edit an event.
37. The team leader shall be able to browse assigned events by the admin
38. The team leader shall be able to schedule an event.
39. The team leader shall be able to take attendance.

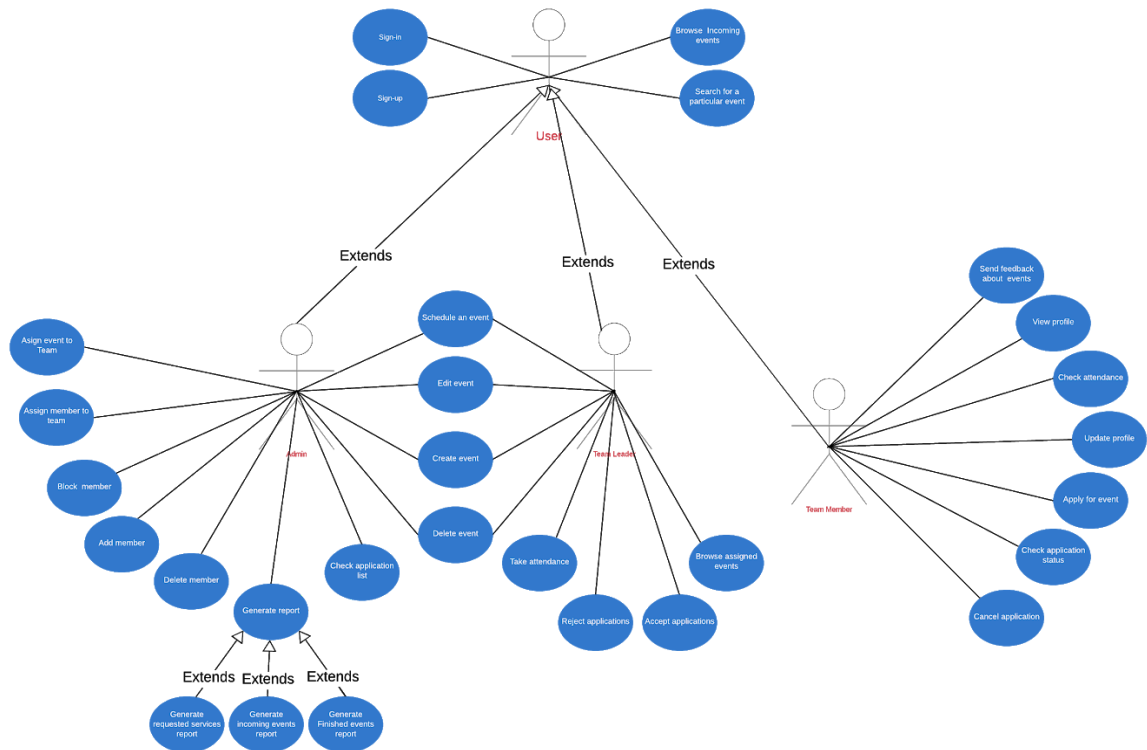

Content of the Website and Organization:

The website will have 12 different webpages:

- Login page.
- Register page.
- Home page, which contains information about the Volunteering Teams Management system and the upcoming events with the Search option.
- Search page.

Distribution of work

Mojtaba Alamer:

First Phase:

- Derived The Requirements.
- Derived The Use Cases from the Requirements
- Draw The Use Case Diagram
- Derived the relation between required functionality and the use cases
- Draw Activity Diagram
- Draw state machine Diagram
- Draw the relations type between Classes in Class Diagram
- Designed login page
- Designed Register page
- Designed Events page
- Designed Admin Dashboard page
- Designed Admin Manage Members page
- Designed Admin Manage Events page
- Designed Leader Dashboard page
- Designed Leader Manage Members page
- Designed Leader Manage Events page
- Linking between pages for different actors
- Provided screenshot for each page in the Presentation Models

Second Phase:

- Implemented GenerateReport page
- Implemented Restriction of unauthorised access to some pages
- Implemented DashBoard page for different type of users
- Implemented edit profile page
- Implemented manage Events page and its subsections(delete event,add,etc.)
- Implemented manage Members page and its subsections(delete member,add,etc.)
- Designed Presentational mode
- Designed the DataBase
- Implemented Take Attendance page

Haitham Alsaeed:

First Phase:

- Lead the team
- Derived The Requirements.
- Derived The Use Cases from the Requirements
- Draw Class Diagram
- Draw navigational Diagram
- Designed Home page
- Designed Search page
- Search result page
- Designed Member Dashboard page
- Designed Event details page
- Select the developing environment
- Choose a color style
- Search for similar websites to benefit from the design
- Add alt attribute to imgs
- Choose images used in the design webpages

Second Phase:

- Implemented the DataBase
- Implemented Registration page and the validation of informations
- Implemented Edit Profile page and the validation of informations
- Implemented Login page
- Designed Sequence Model
- Implemented Sessions
- Implemented Events Page
- Implemented Event Page
